Summary

Enterprise Product Designer, bridging Generative AI logic and high performance UX. For the last 8 years, I have specialized in building products for IT Infrastructure Operations. I have designed AI backed migration workflows and modernization analytics tools that automate wave planning and visualize business risk. I co-facilitated design thinking workshops with cloud specialists to translate technical use cases into functional, high impact enterprise products. I am focused on leveraging GenAI to simplify and optimize enterprise level cloud environments.

Design Skills

- Certified Google prompting essentials
- Figma make AI
- Figma design
- UX Pilot AI
- Claude AI
- Google Gemini
- Design Languages
- IBM Enterprise design thinking for AI
- Cloud computing core Concepts
- Adobe XD & Sketch

Key Achievements

1

Led end-to-end design for an AI driven cloud migration platform, utilizing design thinking to deliver predictive migration wave timelines and an orchestration engine that manages complex, multi-region migration waves (e.g., EMEA to APAC).

2

Conceptualized a guided self service wizard that translates complex infrastructure data into actionable modernization insights, enabling account managers to proactively identify risks and estimate modernization budgets.

3

Designed and delivered a global mobile collaboration platform for disaster management, enabling consultants to orchestrate realtime responses to critical events such as natural disasters and geopolitical disruptions.

Key Projects

- Kyndryl Bridge – Multicould Migration Service Platform
 - Kyndryl Bridge – Cloud Modernization
 - IBM Micro ID – Code refactring engine
 - IBM Risk based Software Patching
 - IBM – Cost & Asset Management Insights
 - IBM ACE Solution Platform
 - IBM ChatOps
 - IBM Business Continuity
-

Certifications

- Google prompting essentials
 - Luma Design Thinking Program
 - Linkedin Figma for UX Design
 - IBM design thinking co-creator
 - IBM design thinking essentials for AI
 - IBM Accessibility advocate
 - AWS for Non-Engineers Cloud Concepts
 - Cloud Computing Core Concepts
 - HFI Web and application design
-
